

I have been notified that the FCC is considering a ruling that could affect some stations I currently listen to that are FM translator service stations. K-LOVE stations 96.9, 104.3 & 102.3 serving the surrounding Dayton promotes wholesome values I think are critical to the benefit of our communities. I have even been encouraged when listening to these stations. I also value the information obtained on these stations. To rule in an unfavorable way against the operation of these stations would, in my opinion, further tip a needed balance over the airwaves on the side of negatively affecting broadcasting. I do not support such a ruling and ask such a type ruling be sustained. Thank you and God Bless America!
